

NEO™ ELECTRONICS AND NS45

Checkpoint's NS45 Antenna has been designed to provide high detection with an almost invisible design. We have listened to our customers and created a new innovative RF EAS design first of its kind to market. With a virtually invisible design our NS45 antenna can be seamlessly integrated into stores in different use cases depending on customer needs.

HIGH DETECTION, SMALL IN SIZE

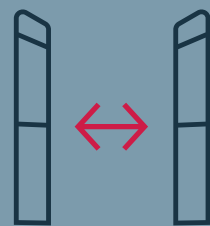

With proven high detection rates, the NS45 antenna can efficiently protect stores and help to maximize business revenues

FLEXIBLE USE CASES

The NS45 can be integrated into stores in different use cases, depending on customer needs

BETTER DESIGN EXPERIENCE

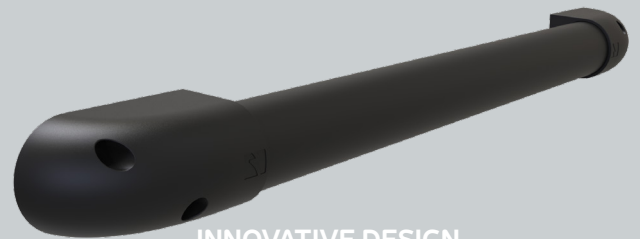

Our NS45 antenna is designed to minimize visibility. With an innovative new design, our NS45 Antenna can be concealed within the cash desk, completely concealed from the outside world.
